

Shape Consulting helps define the value your change initiative is delivering.

We identify the initiatives

- | alignment to your strategy
- | the business worth (financial and non-financial)
- | the whole of lifecycle risk of delivering the benefits

This value assessment enables **constructive executive conversations** to compare your change initiatives against the available options and other initiatives.

It also becomes the basis on which you will be able to assess the relative contribution to your organisation **non-financial business drivers** such as sustainability, safety, performance and reputation.
